

### **AMENDMENTS TO THE SPECIFICATION**

At page 7, lines 13 – 26, please substitute the following the two paragraphs appearing for the paragraphs originally set out:

*“FIG. 2B and FIG. 2C are diagrams illustrating a further embodiment of an electrical device 200. In this example, the electrical device 200 is configured as a switch 102, wherein channel 220 is configured as an enclosed opening positioned adjacent to and opening into the slotted mounting hole 115. In FIG. 2B the enclosed opening is generally elongated in shape. In FIG. 2C the enclosed opening is generally circular in shape. The enclosed opening will preferably be large enough to receive the head 253 and/or the support rim 258 of a mounting screw 250. The slotted mounting hole 115 will be wide enough to receive the diameter of the elongated post 252. Ears 280 and 281 extend from one end of the yoke 210, while ears 282 and 283 extend from the yoke at the end opposite ears 280 and 281.”*

*FIG. 2D is a diagram illustrating a further embodiment of an electrical device 210 wherein channel 220 extends from an outer edge of the yoke 210 into the slotted mounting hole 115. The walls of the channel 220 are substantially parallel to each other. Ears 280 and 281 extend from one end of the yoke 210, while ears 282 and 283 extend from the yoke at the end opposite ears 280 and 281.”*
